

CryptoWallet Guidelines

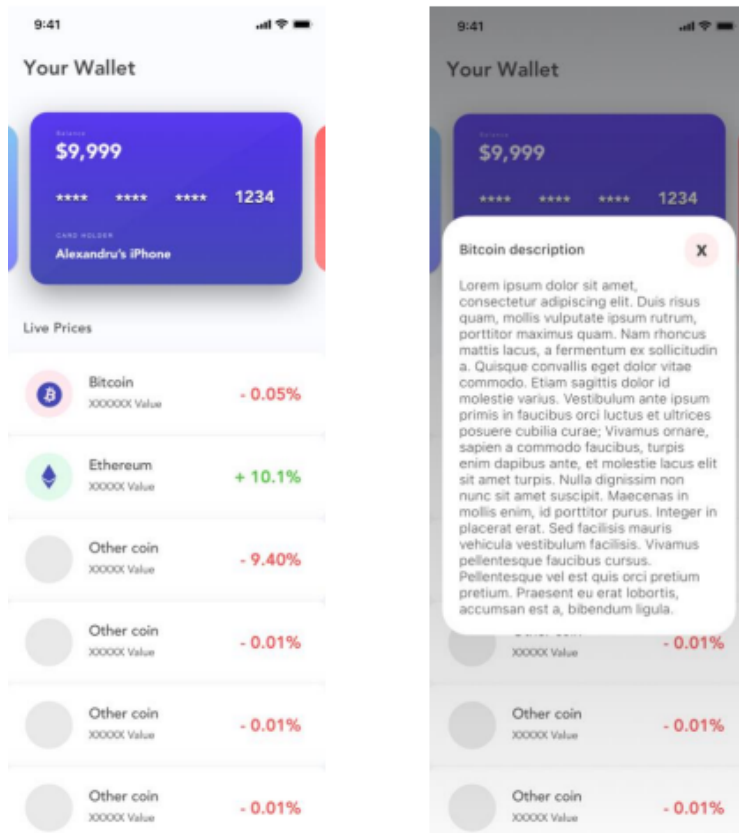

1. Create a detail view for every crypto coin

Folosind URL-ul de mai jos, creeaza un view care sa se deschida la apasarea celei din dashboard. Aceasta componenta trebuie sa se inchida la apasarea butonului “X”.

https://api.coingecko.com/api/v3/coins/bitcoin?localization=false&tickers=false&market_data=false&community_data=false&developer_data=false&sparkline=false

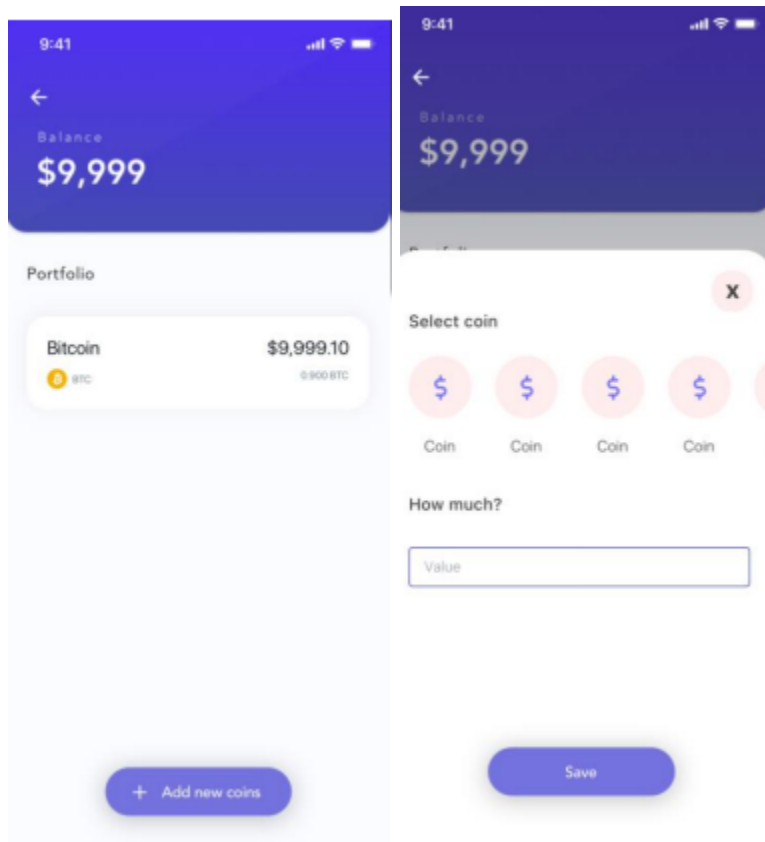

[https://api.coingecko.com/api/v3/coins/\[ID_OF_COIN\]?localization=false&tickers=false&market_data=false&community_data=false&developer_data=false&sparkline=false](https://api.coingecko.com/api/v3/coins/[ID_OF_COIN]?localization=false&tickers=false&market_data=false&community_data=false&developer_data=false&sparkline=false)

Hint: descrierea se afla la cheia “description” si trebuie deserializat.

Paddings: 20 left, right, top
CornerRadius: 30
Culoare text: #3F3F3F

2. Implement Add new coin button + CoinSelection View + Conversion

Button color: #7472DE
Corner Radius: 20
Icon frame: 55 x 55
Image frame: 33 x 33
Icon Foreground: #FD3C72, opacity 12
Text-field corner radius: 5
Text-labels-foreground: #3f3f3f

Paddings: 20 stanga, dreapta; 30 top

Important:

Userul va trebui sa salveze conversia dupa ce a selectat moneda si a introdus valoarea.

Conversia = $\text{currentPrice} * \text{value}$

In portofolio screen afisam doar monedele pe care le detinem.

Hint: For the first assignment you could use DialogFragment and for the second assignment you could use BottomSheet.
